

## **CITY OF FONTANA STANDARDS DESIGN GUIDELINES**

The City of Fontana's Standard Plans for Public Work Construction represents a comprehensive and easy to follow approach for use in conjunction with the Standard Specifications for Public Works Construction, "Greenbook", latest edition, required by the City for proposed public works projects.

The City has a wide option of standard drawings and specifications to choose for preparing the project design plans for their projects using the most current edition as appropriate.

The Design Engineer assumes full responsibility for use of these standards when preparing plans. The Design Engineer assumes that these standards will meet all project requirements. When the City of Fontana Standard Plans do not meet the project requirements and other standards are used they must be shown on the plans.

However, the following standards drawings are recognized for used within the City:

1. San Bernardino County Department of Public Works and Flood Control  
Standards and Specifications
2. Caltrans Standard Plans and Specifications
3. **Standard Plans and Specifications for Public Works Construction**

Any other Agency Standard Plans or Specifications or the use of an Agency's Standard or Specifications over the City Standards must have approval from the City Engineer.
